Cyber Crime Intervention Officer – National Security Database

With a mission to raise awareness about the critical importance of cyber safety, Ameer Ali is a highly sought-after speaker in the field of cyber security. Combining deep technical expertise with a passion for teaching, he delivers thought-provoking presentations that equip audiences with the tools and knowledge to protect themselves in the digital landscape.

With years of experience in Cyber Security, Risk management, Cyber Forensics, etc., he covers a range of cybersecurity topics, including:
- Protecting personal and organizational data from cyber threats
- The latest in cybersecurity trends and how to mitigate risks
- Cyber safety best practices for students and professionals
- Understanding phishing, malware, and ransomware
- Staying secure in an age of increasing digital reliance

Ameer Ali's presentations are known for being interactive, informative, and highly practical. Having spoken at institutions like schools & colleges, conferences, and corporate companies, he is dedicated to fostering a culture of cyber awareness across all sectors, from students to professionals.
